First Class Occupational Safety and Health Products

**“PSE SAFETY
CORPORATION PTE LTD**
was established to provide
first class occupational safety
and health products to our
customer”.

With safety as our top priority, we work closely with occupational Safety and Health professionals in hazard identification, recommendations and selection of personal protective equipment according to their needs. We will continuously strive to meet or exceed our customers' expectations by providing :

- Quality products and efficient service
- Professional advice on the selection of appropriate safety equipment.
- Competitive pricing
- Prompt delivery
- To enhance a safe and working environment in your company.

We provide a comprehensive range of products with common structural of services and satisfaction. We also provide comprehensive training packages to all our customer.

Through our years of experience in the Safety Industry, we are able to better outfit the workman for better protection in his working environment. We are also able to advise on the proper usage, its limitations and maintenance of the external devices.

Model : H8A

Electric ARC Face Shields and Face Protection

An arc flash hazard is a dangerous condition associated with the release of energy caused by an electric arc. This explosive condition includes a broad spectrum of electromagnetic energy, plasma, fragments and a spray of molten materials.

Key Benefits

- Protection value (ATPV) for Elvex FS-18ARC10 Shield is 10 cal/cm²
- Protection value (ATPV) for Elvex FS-20ARC10 Shield is labeled 12 cal/cm². This model is equipped with chin protector.
- Shields come with standard anti-fog coating

- Shields fit Elvex Visor Bracket (VB-10 & VB-30) for mounting to safety caps
- Face and hearing protection can be used simultaneously on safety caps
- Elvex system can be adapted to most major brands of slotted safety caps

Elvex ARC-Shield

Elvex Flash-Pro-HD-FS ARC40

- Certified to ASTM F2178-12 Test Standard.
- Rated at 43 cal/cm² for NFPA 70E Hazard Risk Category 4 applications
- FLASH-PRO™ is a two layer hood made of Westex Ultrastuff 9 oz. over 13 oz.
- The hood's ARC Shield is an Elvex proprietary design molded of Polycarbonate material with special absorbers and made with an industry leading 0.07" thickness for maximum impact and thermal protection.
- The shield is light green, with high visible light transmission.
- The shield's Anti-Fog coating prevents fogging and insures visibility.
- The system's certified components include: Elvex Tectra™ Hard Hat with Visor Bracket and Slot Adaptors, as well as our hood and ARC Shield supplied in one assembly.

Model : HD-FS ARC40

ELVEX Face Shields and Face Protection

Elvex offers face shields for a variety of applications. Shields are available made from Polycarbonate, Lexan™ and Propionate, with a high level of impact resistance. Also available are hard coated shields for abrasion and chemicals as well as silver and gold coated shields for heat applications. Shields are also available to protect against Ultraviolet (UV) light as well as Infrared light, such as welding. Other specialty shields offered by Elvex are steel mesh and nylon mesh screens.

Key Benefits

- Shields for most applications
- Shields in sizes from 12" to 18" wide
- Universal hole pattern, fits many headgear
- Shields fit both Elvex headgear and Visor Bracket (VB-10 & VB-30) for mounting to safety caps
- Face and hearing protection can be used simultaneously on safety caps

Cap Mount Face Shield

Model : FS-16PC-VB-30-HM-60

Model : FS-18L-on-SC-50-helmet

Model : FS-18GL-on-VB-10

Model : HM60-VB20-FS16

Elvex can offer so many choices for safe, cost effective head and face protection. And using Elvex QuickSnap system you can place nearly 30 face shields and visors on any major brand of safety cap.

Using QuickSnap Slot Adaptors, Bracket Arms and Visor Brackets you can add complete above the shoulder protection without investing in brand new hard hats.

Visor Bracket-FS12-15-18

Model :
FS-12L-15L-18L-on-VB-10

Model : VB 10 & VB 30

Elvex Visor Bracket, VB-10, pictured (from left) with:
FS-12L = 12 inches wide Lexan shield
FS-15L = 15 inches wide Lexan shield
FS-18L = 18 inches wide Lexan shield
VB-10 and VB-30 accepts all face shields listed above.

Slot Adaptor

Elvex slot adaptor makes it possible to mount visor bracket for face shield to the safety helmet

Model : SA 29 & SA 93

FACE PROTECTION

GG-25 Legionnaire™ Anti-fog Safety Goggles

Model : GG-25C-AF-AS

Model : GG-25C-AF-bag

- Impact resistant molded lens with Super Coat™ anti-fog coating.
- 2.0 mm thick Polycarbonate lens with a base 3.5 curvature.
- Eighteen (18) built in, indirect ventilation slots for superior fog resistance.
- Wide contact between goggle and face provides for a very comfortable fit.
- Unique and functional nose bridge provides excellent seal.
- This goggle fits over prescription glasses, with room to spare!
- The Legionnaire is equipped with an adjust able elastic support strap.
- Complies with ANSI Z87.1 requirements.
- Tested and certified to CE EN-166

Model : GG-25C-AF-AS

GG-30-AF Visionaire™ Anti Fog Safety Goggles

Model : GG-30-AF

- Base six Polycarbonate lens with Super Coat™ anti-fog coating.
- Impact resistant, molded and 2.2 mm thick lens.
- Four indirect ventilation slots further improves fog resistance.
- Wide contact between goggle and face provides for a very comfortable fit.
- Unique and functional nose bridge provides excellent seal.
- Goggle is equipped with an extra wide and adjustable support strap.
- Visionaire complies with ANSI Z87.1 requirements, as well as CE EN-166.

Model : GG-30-AF

GG-45 Go-Specs II™, hybrid safety glasses with goggle features.

Model : GG-45C-AF

- EVA closed cell foam seal for better fit.
- Automatic swivel adjustment of strap angle
- Ballistic impact resistant molded lens. See test report.
- SuperCoat™ anti-fog coating.
- 2.3 mm thick Polycarbonate lens with a base 9.5 curvature
- 99% UV protection for UV A, B and C, 180-380 nm.
- Tested to ANSI Z87 (+) and CE EN-166

Model : GG-45 Go-Specs II™

SG-37 OVR-Specs™

Model : SG-37C

Model : SG-37G

- Fit over regular prescription glasses
- They are also called O-T-G (over-the-glasses).
- The frame is designed to be less bulky than the traditional OVR-Spec
- Equipped with small side windows
- Soft rubber temples.
- Lens available : Clear & Gray

Model : SG-37 OVR-Specs™

SG-10C Ranger™ With Clear Lens

- Made from impact resistant Polycarbonate
- Ranger fits well over many prescription glasses
- Inexpensive enough to be used as visitor spectacles.

Model :
• SG-10C

RX-200 Bifocal Lens

Model : RX-200C

Model : RX-200G

- Safety Reading Glasses
- RX-200 is available in the following bifocal powers: 1.0, 1.5, 2.0, 2.5 and 3.0
- Soft rubber nose bridge and rubber tipped temples.
- Complies with ANSI Z87.1-2010 (Z87+)
- Lightweight wrap style frame, made from translucent gray Polycarbonate
- Lens Available : Clear & Gray

EYE PROTECTION

SG-12 Acer™, A unique reincarnation

Model : SG-12C

Model : SG-12I-O

- Full coverage lens, with a floating design
- Soft rubber nose bridge
- Comfortable light weight fit
- Meets ANSI Z87+ high velocity requirements
- Ballistic Vo rated for impact, 4X the ANSI requirement
- CE certified and complies with EN-166 requirements

Available in : Clear, Indoor/Outdoor, Gray and Flash Mirror lens

Model : SG-12G

- Designed for H10 Uncorded Earplugs (Bulk) Code 25708
- Mounting instructions and hardware included

Brand : **JACKSON**

H20 Reusable Earplugs

H20-CORDED-67221

H20-UNCORDED-67220

- NRR 26
- Traditionally styled offering
- Ridged stem for better grip for insertion and removal
- Three soft flanges collapse to conform to ear canal
- Individually packaged for hygienic storage
- High visibility for easy compliance monitoring
- Corded and uncorded options available
- 100pairs/box, 4boxes/case

Brand : **JACKSON**

HEARING PROTECTION

3M 1110(corded)/1100(uncorded) Disposable Foam Earplugs

Model : 3M-1100-Uncorded

Model : 3M-1110-Corded

- Tapered shape to fit the ear canal comfortably
- Soft foam seals the ear comfortably
- Smooth, dirt resistant surface for hygiene
- Comfortable for a wide range of ear sizes
- Hypo-allergenic material
- Bright Orange colour for good visibility
- Packing : 3M 1100 - 200prs/box
3M 1110 - 100prs/box

Brand: **3M**

3M 4004(without case)/4002(with case)

- Patented, premolded, triple-flange design inserts easily
- No rolling or sizing needed to get a comfortable, protective fit
- Hypoallergenic polymer is washable and reusable
- Carrying case keeps plugs clean and accessible for re-use.
- NRR 25 dB

Brand : **3M**

3M 1270(without case)/1271(with case) Reusable Earplugs

Model : 3M-1270

Model : 3M-1271

- Reusable, multi-flanged design
- Fits securely in the ear canal and helps provide reliable protection
- Bright orange colour provides high visibility to allow employers to identify employees wearing their ear plugs.
- Soft cloth cord helps prevent loss of ear plugs
- Can be washed and reused many times
- NRR 24 dB
- Packing : 3M 1270 - 100prs/box
3M 1271 - 50prs/box

Brand : **3M**

3M Resuable Ear Plugs, 3M-1290/1291/1292/1293

Model : 3M-1290-1291

Model : 3M-1292-1293

- Softer material provides improved wearer comfort.
- Translucent blue color appeals to a variety of users.
- Now available in two corded options - braided and plastic - for easy access and to help prevent loss.
- 3-flange design fits securely in the ear.
- Finger grip stem for easy insertion and to help keep ear plugs clean.

Cap Mount Earmuff

ELVEX QuickSnap Ear Muffs for Safety Helmet HM-2093

- NRR levels: 25dB
- Universal blade fits most slotted safety caps
- Dielectric construction
- Integrates with a variety of face shields
- Can be attached to non slotted safety caps
- Most functional system on the market

Model : HM-2093

ELVEX QuickSnap™ Ear Muffs for Safety Helmets HM-8093

- NRR levels: 28dB
- Universal blade fits most slotted safety caps
- Dielectric construction
- Integrates with a variety of face shields
- Can be attached to non slotted safety caps
- Most functional system on the market

Model : HM-8093

Cap Mount Integrated System

Model : BR-29 & BR-93

Model : QS-29

Model : SA-29 & SA-93

Model : VB 10 & VB 30

Components for an integrated protective system:

1. Visor Bracket, VB-10, carrier of a variety of face shields for use with safety helmets with a standard brim.
2. Visor Bracket, VB-20, carrier for face shields for use with short brim safety helmets (such as MSA) or to provide extra space between the face shield and the face, in order to accommodate cartridge respirators.
3. Visor Bracket, VB-30, looks similar to VB-20, but is designed to accommodate newer helmet designs with raised accessory slots or sloping brims. Elvex safety helmet models SC-30 works best with VB-30.

4. Arm Bracket for cap mount muffs, BR-29/93. On BR-93 a removable slot filler makes it possible to fit one blade to most safety caps equipped with an accessory slot.
5. Slot adapters are used when you want to mount face shields to a safety helmet w/o the use of ear muffs.
6. Quick Slot, QS-29, creates an accessory slot on most safety caps and bump caps, that lack accessory slots.

CoolGuard Combo HB-3000

- HB-3000, CoolGuard, is rated at 27 dB NRR
- CoolGuard uses the Equalizer Earmuff, HB-2000.
- CoolGuard uses Elvex FS-3000, Lexan impact and heat resistant face shield.

Model : HB-3000

ValueMuff™, HB-25

- 25 dB Certified NRR 25dB to ANSI S3.19-1974
- Soft and pliable SuperSeal™ ear cushions.
- Fully dielectric construction
- Low headband force and light-weight, 6.8 oz.
- SuperSeal™ ear cushions provide outstanding seal and comfort
- Ease of adjustments with flexible slide clips.
- Dielectric construction

Model : HB-25

HEARING PROTECTION

MaxiMuff™, HB-35

- NRR 28dB Certified NRR to ANSI S3.19-1974
- Soft and pliable SuperSeal™ ear cushions and a soft cushioned headband.
- Fully dielectric construction
- Low headband force for great comfort.
- Multi-position use with Support Strap (SS-25).
- Self-aligning suspension, and easy adjustment.

Brand :

Model : HB-35

ELVEX UltraSonic™ HB-650

- 29 dB NRR from certified US laboratory ANSI S3.19-1974
- Superb full spectrum and low frequency attenuation
- Extra wide ear cushions for highest comfort
- Soft padded headband with low force
- Steel headband tolerates temperature extremes
- Solid construction
- You get the ultimate performance and comfort with this muff

Brand :

Electronic Earmuffs

Elvex Plug-in™ COM-610

Model : Com-610

- New generation features fork style cushioned steel headband
- 25 dB NRR/NRS as tested by certified laboratory to ANSI S12.6-2008
- Connects via 3.5 mm stereo plug to Com radios, MP3 players, CD players and more.
- The headset is equipped with a volume control knob, allowing the user to easily adjust the volume at the headset.
- Now with larger speakers for excellent sound quality for both music and voice communications
- Three plug adaptors are included 2.5 mm stereo, 2.5 mm mono, 3.5 mm stereo
- Electronic limiter set at 82 dB or 85 dB for compliance with OSHA requirements.
- The Plug-in headsets uses Hygiene Kit (cushions and foam pads), HK-600

Model : Com-610-adapters

Brand :

Model : Com-610

Level Dependent Impulse Filter Muffs

- Allows you to have close range communications in select continuous noise environments.
- The gain limiter suppresses sounds exceeding 82 dB.
- Frequencies below 400 Hz and above 4,000 Hz are not processed and therefore the speech to noise ratio can be improved in many continuous noise environments.
- Elvex Impulse provides hearing protection very effectively on the shooting range. The gun shots are eliminated, but the shooting instructor can still be heard.
- An auto off switch will turn off the headset after four hours of continuous use
- Com-655 Elvex Level Dependent Ear Muff, 25 dB NRR.

Brand :

Model : Com-655

Elvex Guide Communication System

COM-690-Transceiver

COM-691-Receiver

COM-699-Microphone

Elvex Guide is an easy to use, multi-purpose communication system that offers superior sound quality and hearing protection for use in noisy environments. There are several distinctive applications:

- Elvex Guide system provides a way to communicate with visitors, and also allowing visitors to ask questions during the tour.
- General person to person communications in noisy environments can also be facilitated with Elvex Guide System for instruction, training, plant trouble shooting, working in groups, utility pole work, tree service work and many other applications.
- It's easy to use and adapts to many work situations where person-to-person or group communication is essential.
- Easy to Use: Set transmitting and receiving channels and you are done
- Filters out Noisy Environments
- Group or Person to Person Communication.
- Communication heard without interference up to 75 feet
- The Guide provides effective hearing protection of 22 dB NRR
- The Guide System is FCC certified.

Product Name	Product Number	Product Description
Guide System Transceiver	COM-690	Guide Transceiver, 22 NRR, uses 2 AA batteries
Guide System Receiver	COM-691	Guide Receiver, 22 NRR, uses 2 AA batteries

RESPIRATORY PROTECTION

Dräger X-Plore® 1300

Proven, Sophisticated, Comfortable

The Dräger X-Plore® 1300 combines proven and reliable respiratory protection with intelligent new ideas ensuring maximum comfort, ease of use and high end-user acceptance. Available in all three EN protection classes FFP1, FFP2 and FFP3 according to EN 149:2001+A:2009 and NIOSH, the Dräger X-Plore® 1300 provides effective protection against dust as well as solid and liquid particles. All face pieces are optionally available with the CoolMax™ exhalation valve for additional comfort.

CoolSAFE™ filter material
Performance that makes a difference: CoolSAFE™ filter material produced from high-performance filter media combines low breathing resistance and high filter performance in one mask. The material also exceeds the challenging dolomite dust test requirements.

Flexible nose clip
Ensures a great fit in the most critical area.

Nose seal
Safe sealing in the most critical area: all face pieces are equipped with special nose seal. It is sweat-absorbing, comfortable and most importantly ensures an effective seal around the nose.

Formed mask body
Proven, ergonomic, stable: The special design and shape of the mask body offers comfortable and secure fitting to faces with a wide variety of shapes and sizes. The masks can be donned quickly and easily. The interior volume ensures wearing comfort along with easy communication. Inside, the mask body is specially reinforced, thus ensuring dimensional stability throughout long periods of time.

VarioFLEX™ head harness with EasyStop
Easy to don/doff and adjust with a pressure-free fit: This continuous loop head harness is constructed from a robust, tear-proof textile strap. In contrast to other face pieces, no clips are required – preventing uncomfortable pressure and allergic reactions. The head harness can be donned/doffed easily and quickly, and without hair entanglement. Thanks to EasyStop, the head harness can easily be adjusted to fit various head sizes while sitting comfortably and safely.

CoolMAX™ exhalation valve (optional)
Breathe easy and comfortably with extremely low breathing resistance. The exhalation valve releases humid and warm air, preventing heat build-up underneath the mask, allowing you to stay cool while working hard.

Hypoallergenic inner layer
Comfortable to wear: the hypoallergenic inner layer is easy on your skin and gives the user added comfort even when used for longer periods of time.

Colour coding
Fast recognition without confusion: the colour coded nose clip and valve classify the three EN protection levels, dark-blue (FFP1), light-blue (FFP2) and white (FFP3). NIOSH provides two colour coding. Light-blue for R series and dark-blue for N series. Providing easy recognition when selecting the right mask.

RESPIRATORY PROTECTION

Dräger X-Plore® 1700

Breathe Cool, Stay Safe

Dräger X-Plore® 1700 is the new generation of filtering face piece respirators. With its CoolSAFE™ in applications with exposure to dusts, e.g. in industry, mining and specialized trades. It's a user-friendly mask with easy handling and a high degree of wearing comfort. The Dräger X-Plore® 1700 in the protection classes N95 and R95 which are optionally available with the CoolMAX™ exhalation valve for additional comfort. An odor control version containing activated carbon layer is ideal for users which battle with unpleasant nuisance odors below the permissible exposure limit. All versions are NIOSH approved.

CoolSAFE™ filter material
Performance that makes a difference:
CoolSAFE filter material produced from high-performance filter media ideally combines low breathing resistance and high filter performance in one mask.

Flexible nose clip
Ensures a great fit, in the most critical area.

Soft inner layer
Comfortable to wear: the inner material layer is not only soft and hypo-allergenic, but also repels moisture thanks to its hydrophobic properties, keeping breathing resistance constantly low, when used for long periods of time.

Folded form
All Dräger X-plore 1700s are flat-folded, saving space and making them easier to transport.

Hygienic individual packaging
Each facepiece is individually packed in a plastic bag, ensuring it stays clean and hygienic.

VarioFLEX™ head harness
This continuous loop head harness is constructed from a stable, elastic, textile strap which is easy to don and doff while sitting comfortably with minimal pressure. The soft, tear-proof elastic easily stretched to fit various sizes of head and prevents hair entanglement.

CoolMAX™ exhalation valve (optional)
Breathe easy and comfortably: thanks to an extremely low breathing resistance. Additionally, the specially engineered CoolMAX exhalation valve releases humid and warm exhaled air, preventing heat build-up underneath the mask, allowing you to stay cool.

Dräger X-Plore® 2100

The Reusable Alternative to Disposable Dust Masks

Frequent work in a dusty environment requires reliable respiratory protection. Dräger X-Plore® 2100 is your reusable alternative to disposable dust masks. The replaceable filters save costs, making the Dräger X-Plore® 2100 the ideal combination of safety and economic efficiency.

Ergonomic, non-slip head harness
The ergonomic head harness combines stability with anti-slip features, making donning & doffing the mask quick and easy.

Comfortable mask body
The ergonomically designed mask body offers a great sealing surface. The choice of two high-quality materials – EPDM or silicone – along with two sizes for the silicone mask ensure a great fit.

Dräger replaceable filters
The large surface area of the replaceable filters ensure long-lasting filter capacity and low breathing resistance. Filter change out is simple and cost effective.

ST-1762-2005

The drop-down harness system
Stay protected:
The drop-down system allows you to remove the mask without removing a hard hat or faceshield. By simply opening the neck clips the respirator slides down from your face and sits close to your body, protected from dirt and dust.

Easy-breathing exhalation valve
The exhalation valve leads the exhaled air directly downwards out of the mask, keeping you comfortable inside the mask.

Your Benefits :

- Major cost savings – long-life filters can be easily exchanged.
- Ergonomic non-slip head harness.
- High filter efficiency and long service life due to large surface area of Dräger replaceable filters.
- Excellent sealing surface through ergonomic design.
- Long service life – easy to maintain with quick and easy assembly and disassembly. Can be cleaned in designated washing machines at maximum temperature of 60 °C.

Dräger X-Plore® 5500 for safe breathing and clear vision

Our Solution for Your Applications

Comprehensive respiratory and eye protection make the Dräger X-plore® 5500 full face mask the right solution for environments in which respiratory protection coupled with eye protection is required.

Double-layered face seal
The highest protection factor through its triple sealing action ensures a great seal for every type of face.

Large visor
Excellent field of vision without distortion plus a high level of chemical, thermal and mechanical resistance. The triplex visor is extremely scratch-resistant with high chemical resistance.

Safe and easy bayonet connection
A unique two-point bayonet connector attaches both filters to the mask using the same technique. Filters only go in one way – so you can't get it wrong. Place the filter in the connection and turn a 1/4 turn downwards. The filter gently clicks into place.

ST-948-2008

5-point head harness
The harness allows quick and easy donning and doffing of the mask without hair entanglement.

Universal size
The universal size ensures an almost perfect fit for all face sizes – keeps storage and spare parts handling simple.

Compact, low profile design
The swept-back position of the filters guarantees the user's field of vision is free from obstruction.

ST-944-2008

RESPIRATORY PROTECTION

Dräger X-Plore® 3000

Dräger "FlexiFit" head harness

The new smooth material ensures excellent fit to your head without hair entanglement. You won't notice it under your hard hat.

Flexible nose sealing strip

The special design of the nose sealing strip ensures leak free sealing and an optimal fit with safety glasses.

Innovative X-guided strap system

Cross over straps ensure an even weight distribution –giving you ultimate comfort without pressure.

Compact, low profile design

The swept-back position of the filters guarantees a wide field of vision free from obstruction and ensures optimal fit for use under protective visors. Three sizes (S, M, L) ensure a perfect fit for every type of face.

New "DrägerFlex" material
Specially developed for the Dräger X-plore 3500 mask body
"DrägerFlex" combines hypoallergenic properties with excellent chemical resistance. (Dräger X-plore 3500).

"Drop Down" strap system
Allows you to remove the mask without removing a hard hat or faceshield:
By simply opening the neck clips the respirator slides down from your face and sits close to your body, protected from dirt and grime. (Dräger X-plore 3500 only).

Safe and easy bayonet connection
A unique two-point bayonet connector attaches both filters to the mask using the same technique. Filters only go in one way – so you can't get it wrong. Place the filter in the connection and turn a 1/4 turn downwards. The filter gently clicks into place.

RESPIRATORY PROTECTION

The Dräger X-plore®6000 full face masks

After decades of use, Dräger full face masks have become the known standard for quality, reliability and comfort. These full face masks are the successors to the Panorama Nova standard threaded masks – redesigned and improved with fresh colors and an integrated bar code.

Double-layered face seal

The highest protection factor through its triple sealing action ensures a safe seal for every type of face – in one universal size. The mask body is available in two materials: EPDM and silicone.

Large visor

Excellent field of vision without distortion. Different materials offer high resistance to chemicals, heat and mechanical stress guaranteeing a long service life.

Highly compatible standard Rd40 thread connection

Easy to service and widely compatible standard thread connection, these masks fit to Rd40 threaded filters.

5-point head harness

Quick and easy donning and doffing is guaranteed. The roller buckles and wide flaps ensure comfortable handling without hair entanglement.

Integrated barcode

A barcode inside the mask makes checking inventories and carrying out maintenance easy

RESPIRATORY PROTECTION

The Dräger X-plore®7000 Powered Air Purifying Respirators

The Dräger X-plore® 7000 series powered air purifying respirator systems offer you respiratory protection without breathing resistance. Thanks to a universally compatible line of hoods, helmets and visors the 7000 Series provides you major flexibility for all your operations.

The Dräger X-plore®7300

The Dräger X-plore® 7300 powered air purifying respirator protects you from hazardous particles. Main application areas include grinding, welding, metal processing, wood-working and farming applications. Especially during long usage periods, it is the optimal choice for respiratory protection in these areas.

Continuous air flow

The air supplied can be adjusted to meet your individual needs. Depending on the application the air flow can be individually adjusted for helmets, hoods, visors and masks.

Multi-functional control panel

Everything is under control with the easy to operate multifunctional control panel. By pressing a button the air flow can be adjusted and the battery status and filter load be monitored.

Visual and audible alarm signal

With flashing lights and loud alarm signals the two-stage warning device provides for your safety in any potentially hazardous situation.

Model: Dräger X-Plore® 7300

Model: Dräger X-Plore® 7300 additional battery and charger

Model: Dräger X-plore® 7300 Filter TH/TM3 P SL R, pre-filter, odour filter

Model: Dräger X-plore® Comfort belt standard

Flexible filter unit

Optionally, pre-filters and carbon-layered odour filters are available.

Comfort belt standard

The ergonomically designed comfort belt makes it easy to carry the unit in any working environment. For supreme comfort a premium version with additional padding is available.

NiMH-battery

With an operating time of up to 15 hours the NiMH battery ensures highest possible freedom of movement and independence in an ergonomically compatible way. The NiMH battery can be charged separately or while installed in the X-plore® 7300 unit.

Full range of accessories

The Dräger X-plore® Helmets, hoods and visors as well as the Dräger X-plore® 4740 half masks and Dräger X-plore® 6000 full face masks can be combined with the Dräger X-plore®7300 series.

The Dräger X-plore®7500

The Dräger X-plore® 7500 powered air purifying respirators offer effective respiratory protection against hazardous gases, vapours and particles without breathing resistance. Applications range anywhere where dusts & gases contaminate the air – from painting up to work in the chemical, petrochemical, and farming industry.

Visual and audible alarm signal

With flashing lights and loud alarm signals the two-stage warning device provides for your safety in any potentially hazardous situation.

Continuous air flow

The air supplied can be adjusted to meet your individual needs. Depending on the application the air flow can be individually adjusted for helmets, hoods, visors and masks.

Comfort belt premium

The ergonomically designed comfort belt makes it easy to carry the unit in any working environment.

Full range of accessories

Dräger X-plore® Helmets, hoods and visors as well as the Dräger X-plore® 4740 half masks and Dräger X-plore® 6000 full face masks can be combined with the Dräger X-plore® 7500.

Multi-functional control panel

Everything is under control with the easy to operate multi-functional control panel. By pressing a button the air flow can be adjusted and the battery status and filter load monitored

Standard Dräger

filter Rd40 – easy logistics! If you are already using Dräger X-plore® Rd40 filters with your masks, you can use the same filters with the Dräger X-plore® 7500 – no additional filters must be stocked.

NiMH battery

With an operating time of approx. 6 up to 10 hours the NiMH battery ensures you enough time to get the job done. The NiMH battery can be loaded separately or while installed in the unit.

RESPIRATORY PROTECTION

The Dräger X-plore®9000

Supplied Air System Delivering Air to You

Dräger X-plore® 9000 system is an inexpensive and comfortable belt unit for light-duty compressed airline applications. Approved for the use with Dräger X-plore® Half and full face masks, Dräger X-plore® Helmets, hoods and visors this modular system provides comfortable and reliable respiratory protection in accordance with EN 14594:05.

Via a 10-metre compressed air hose Dräger X-plore® 9000 is connected to a source of breathing air (pressurised ring main, mobile air source or a compressor). An adjustment valve on the belt unit enables the user to regulate the air supply between 170 and 400 l/min and therefore adapt the air flow to his or her individual needs. The Dräger X-plore® 9000 is characterised by a particularly low noise level and is very light in weight, enabling the user to work safely for long periods while benefiting from excellent comfort.

Completing the supplied air system is an optional air conditioning unit. This filter station removes particles, adhesions like oil mists and unpleasant odours from industrial compressed air and therefore substantially improves the quality of the inhaled air.

The Dräger X-Plore® Helmets, Hoods And Visors

Different Combinations For All Of Your Applications

Our extensive range of Dräger X-plore® Helmets, hoods and visors with their great variety of combinations offer utmost flexibility. All head pieces can be flexibly used with the Dräger X-plore® 7300, 7500 and Dräger X-plore® 9000 units. A system that optimally adapts to your requirements.

Wherever action is required: the protective headpieces of the Dräger X-plore® System is the first step in adequate protection. The headpiece portfolio includes the Dräger X-plore® Short hood which covers the head and face. If additional protection for the neck is required we recommend using the Dräger X-plore® Long hood, which is also available as TH3 version with a higher protection factor.

The Dräger X-plore® Protective face shield with a specially developed air duct system for utmost wearing comfort is the optimal combination of respiratory and eye protection. For areas where it is mandatory to wear a hard hat the Dräger X-plore® Protective helmet with visor is the right choice. Aside from conventional welding shields the Dräger X-plore® Welding visor is also available with auto-darkening lenses. With this great variety of combinations it is not the system that decides about the alternatives, but the user.

San Huei SH5551, N95 Disposable Respirator

- NIOSH N95 Compliance
- Economical and easy to use
- Packing 20pcs/box, 12boxes/ carton

Brand : San Huei

Reusable Respiratory Protection

3M 6000 Series, Full Facepiece Respirator

- Single DIN thread port on the front of the facepiece
- Compatible with 3M 6000 Series Cartridges
- Varying cartridges provide a wide range of protection against different gases, vapours and particulate hazards based on NIOSH approvals
- Available Sizes :
Small – 6700
Medium – 6800
Large – 6900

Brand : **3M**

3M 6000 Series, Half Facepiece Respirator

- Lightweight TPE material
- Low maintenance, Cost effective
- Compatible with 3M 6000 Series Cartridges
- Varying cartridges provide a wide range of protection against different gases, vapours and particulate hazards based on NIOSH approvals
- Available Sizes :
Small – 6100
Medium – 6200
Large – 6300

Brand : **3M**

3M 7000 Series, Full Facepiece Respirator

- Silicone Facepiece
- Compatible with 3M 2000, 6000 & 7000 Series Cartridges
- Available Sizes :
Small, Medium, Large

Brand : **3M**

3M 7000 Series, Half Facepiece Respirator

- Reusable
- Silicone Facepiece
- Uniquely Designed with 3M Cool Flow™ Exhalation Valve
- Available Sizes :
Small – 7501
Medium – 7502
Large – 7503

Brand : **3M**

Organic Vapour Cartridge

- Protects wearer from organic vapours

Brand : **3M**

Part No. : 6001

Acid Gas Cartridge

- Protects wearer from acid gases (chlorine, hydrogen chloride, sulfur dioxide, hydrogen sulfide, hydrogen fluoride, chlorine dioxide)

Brand : **3M**

Part No. : 6002

RESPIRATORY PROTECTION

Organic Vapour & Acid Gas Cartridge

- Protects wearer from organic vapours and acid gases (chlorine, hydrogen chloride, sulfur dioxide, hydrogen sulfide, hydrogen fluoride, chlorine dioxide)

Brand : **3M**

Part No. : 6003

Ammonia & Methylamine Cartridge

- Protects wearer from ammonia and methylamine

Brand : **3M**

Part No. : 6004

Formaldehyde & Organic Vapour Cartridge

- Protects wearer from formaldehyde and certain organic vapors

Brand : **3M**

Part No. : 6005

Multi Acid Gas & Organic Vapour Cartridge

- Protects wearer from organic vapors, acid gases (chlorine, hydrogen chloride, sulfur dioxide, chlorine dioxide, hydrogen sulfide, methylamine, hydrogen fluoride), ammonia and formaldehyde

Brand : **3M**

Part No. : 6006

Mercury Vapour Cartridge

- Protects wearer from mercury vapour and chlorine with "end-of-service life indicator" (ESLI)

Brand : **3M**

Part No. : 6009

P100 Cartridge

- 99.97% filter efficiency for all particulates

Brand : **3M**

Part No. : 7093

N95 Pad/Prefilter

- 95% filter efficiency for non-oil based aerosol particulates

Brand : **3M**

Part No. : 5N11

Pad Retainer

- N95 Pad/Prefilter retainer

Brand : **3M**

Part No. : 501

Pancake filter

- 95% filter efficiency for all particulates

Brand : **3M**

Part No. : 2071

Pancake filter

- 99.97% filter efficiency for all particulates

Brand : **3M**

Part No. : 2091

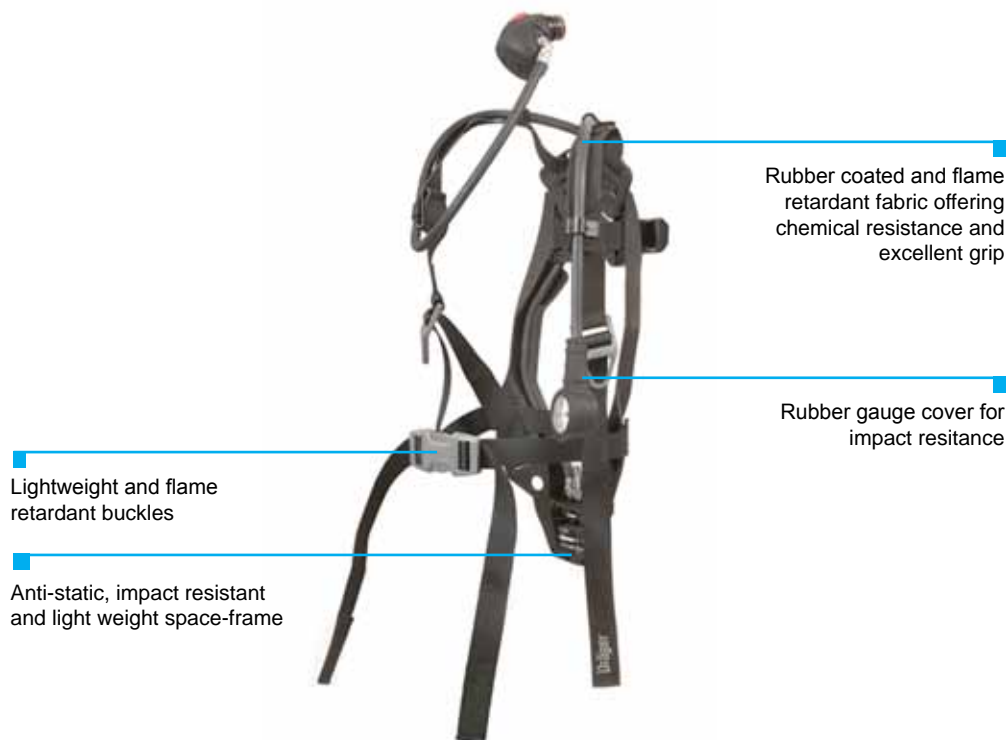

Self Contained Breathing Apparatus

Dräger PAS® Lite Compressed Air Breathing Apparatus

For use in industrial applications where a simple, robust and easy to use breathing apparatus is required, the Dräger PAS® Lite Self-Contained Breathing Apparatus (SCBA) combines reliability with comfort and performance. Lightweight yet robust, this pneumatic gauge SCBA offers excellent service life as well as being easy to maintain.

- Lightweight and reliable with a good service life
- Carrying system offers excellent load distribution
- Compatible with proven and robust air supply systems
- Innovative space-frame integrating the hoses to eliminate entanglement and reduce snagging
- Easy to clean and maintain service friendly design

Dräger PARAT® Escape Hoods

Dräger PARAT® Escape Hoods were developed in cooperation with users- always with the focus on the fastest escape. Optimized operation and wearing comfort, a robust housing and tested filters guarantee that the wearer of the Dräger PARAT® is protected from toxic industrial and fire-related gases, vapours and particles for at least 15 minutes.

Ready for Escape in Only 3 Steps

Exceptionally innovative and intuitive : When opening the packaging, the filter plus is automatically released from the filter. The filter is then deployed into operational position and the hood can be immediately donned. Thanks to the self-adjusting internal head harness, no additional adjustment is required. All you have to do is : open the packaging, remove and don the hood and leave the danger zone.

Robust and Ergonomic

We at Dräger know : Escape hoods and comparable equipment are usually carried in a closed state and rarely opened - only in situations of danger. That is why both, ergonomics and carrying comfort were considered when designing the packaging of the Dräger PARAT. When on duty, the user can carry the escape hood on belt or a shoulder strap, a grip clip, or a belt clip. The PARAT Hard Case can also be mounted on the wall using a wallholder. Additionally, the robust packaging of the Dräger PARAT protects the escape device from damage.

You can select between two packaging types :

- The Hard Case provides splash water protection (IP54)
- The Soft Pack provides dust protection (IP5).

Both packagings have windows to check the filter expiration date and the condition of the device.

Reliable Protection

The escape hoods are equipped with high-performance filters. The filters reliably protect from a wide range of toxic industrial and fire-related gases, vapours and particles.

Particularly convenient : The security seal on the packaging shows if the unit has been opened. In addition, the filter is tight sealed with two filter plugs.

16 Years Total Service Life

Replacing the filter after 8 years will extend the service life of Dräger PARAT® Escape Hoods to 16 years in total. For this, Dräger offers filter replacement service or an expert training for your employees. In the long term, this offers you great cost savings.

RESPIRATORY PROTECTION

Clearly Visible Hood

Hood in signal colour for high visibility

Internal Head Harness

Thanks to the automatically adjusting internal head harness, no additional tightening of the hood is required.

High-performance filter

Filter expiration date is clearly marked; the filter is automatically released from the packaging when opened.

High-performance filter

Filter expiration date is clearly marked; the filter is automatically released from the packaging when opened.

Over Protection

16 years of total service life (provided the filter is exchanged after 8 years), Hood provides respiratory and eye protection.

Clear View

Wide field of vision due to a specially formed visor. Always a clear view thanks to a special anti-fog coating.

Good Fit

Specially designed half mask fits a wide variety of face sizes.

Textile Neck Seal

Seal, alternatively available with an elastomeric neck seal for an even higher protection level.

Dräger Parat 4700 Industrial Escape Hood

- Use: protection against toxic industrial gases, vapours and particles
- Filter: ABEK P3 Filter
- Approval: according to DIN 58647-7 for filtering escape devices; filter additionally tested in accordance with EN 14387:2004 for gas filter(s) and combined filter(s).
- Packaging types: available in Hard Case and Soft Packing

Brand : **Dräger**

Dräger Parat 5500 Fire Escape Hood

- Use: protection against toxic fire-related gases, vapours and particles
- Filter: CO P2 Filter
- Approval: according to EN 403:2004 for fire escape hoods, additionally tested for the use against H₂S (at 2,500 ppm) in accordance with DIN 58647-7
- Packaging types: available in Hard Case, Soft Pack and Single Pack.

Brand : **Dräger**

Dräger Parat 7500 Fire And Industrial Escape Hood

- Use: protection against toxic industrial gases, vapours, particles and fire-related gases
- Filter: ABEK CO P3 Filter
- Approval: according to EN 403:2004 for fire escape hoods; according to DIN 58647-7 for filtering escape devices; filter additionally tested in accordance with EN 14387:2004 for gas filter(s) and combined filter(s)
- Packaging types: available in Hard Case and Soft Pack
- Alternatively available with an elastomeric neck seal for increased protection

Brand : **Dräger**

Dräger Parat Training Hood

- Use: for training purposes
- Filter: Hood comes with a filter dummy
- Packaging types: available in Hard Case, Soft Pack and Single Pack

Brand : **Dräger**

Dräger PARAT® Filtering Escape Devices

When Danger is Lurking

The industrial filtering escape devices Dräger PARAT® 3100 and Dräger PARAT® 3200 have a vital task: to protect people when escaping from hazards into a safe environment.

Despite extensive precautions, accidents still happen – and dangerous gases can break out into concentrations that are dangerous to life and health. These handy and efficient devices are designed for a 15-minute escape period and offer the best possible protection in hazardous situations and thus considerably enhance your chance to make a safe escape.

Model: Dräger PARAT® 3100

Model: Dräger PARAT® 3200

Dräger PARAT® 3100 and 3200

- The Dräger PARAT® 3100 half mask with quick release opening.
- Safe and easy donning even for inexperienced users.
- The Dräger PARAT® 3200 mouthpiece has a nose clip for lowest possible leakage and easy use for bearded wearers.
- ABEK filter for protection against numerous toxic gases and vapors.
- Sturdy, handy packaging – for a long service life.
- Transparent cover with flexible clip – can be carried close to the body – e.g. on your belt.

Coated Gloves

Ansell-Hyflex-11-500

- Black foam nitrile-coated palm
- Ergonomically designed DuPont™ Kevlar® stretch liner with spandex
- Provides "second skin" closeness, reducing risk of snags and cuts
- Ability to handle sharp parts with confidence, increasing productivity and safety
- Enhances grip in light oil conditions with good abrasion resistance
- Silicone-free and natural rubber latex-free for worker and product protection

Brand: **Ansell**

Model : HYFLEX-11-500

Ansell-Hyflex-11-801

- Black foam nitrile coating / Dark gray liner
- Patented Knitted Variable Stitch Design (KVSD)
- Advanced technology for relaxed fit in high stress areas
- Molds naturally to hand, helping prevent fatigue
- Channels oil away from glove surface for sure grip in light oil applications
- Industrial-friendly color hides dirt and grime, increasing time between laundry cycles
- Enables handling of small parts with precision, dexterity and flexibility

Brand: **Ansell**

Model : HYFLEX-11-801

Cut Resistant Gloves

GoldKnit® Lightweight 70-200

- 100% DuPont™ Kevlar® glove provides light-duty cut protection
- Knitted and uncoated
- Protection from sharp edges of metals, ceramics, glass and other materials
- Reversible design allows glove to be worn on either hand, reducing replacement costs
- Launderable

Brand: **Ansell**

Model : ANSELL 70-200

GoldKnit® Mediumweight 70-215

- 100% DuPont™ Kevlar® string knit for cut protection
- Knitted and uncoated
- Protects hands from sharp metal, ceramic, glass and other edges
- Reversible design allows glove to be worn on either hand, reducing replacement costs
- Launderable for extended life

Brand: **Ansell**

Model : ANSELL 70-215

GoldKnit® Mediumweight

- 100% DuPont™ Kevlar® string knit for cut protection
- Protects hands from sharp metal, ceramic, glass and other edges
- Styles featuring PVC dots make them the ideal choice when enhanced grip is desired
- Reversible design allows glove to be worn on either hand, reducing replacement costs
- Launderable for extended life

Brand: **Ansell**

Model : ANSELL-70-330

PolarBear® Supreme

- Yarn contains stainless steel for exceptionally high cut protection
- Knitted and uncoated
- Heavyweight glove with no seams to irritate hands
- More cost effective than chain mesh designs
- Reversible so it can be worn on either hand

Brand: **Ansell**

Model : ANSELL 74-301

Uncoated Gloves

ANSELL ChemTek™ Viton/Butyl

- Delivers a unique balance of ergonomic design and tactile sensitivity with optimum chemical splash protection
- Viton® gloves provide an extra level of protection in applications involving aromatic chemicals and chlorinated solvents
- The Viton® layer over the butyl means a lower cost glove for aggressive chemical exposure
- Each pair is packed with an individual insert so critical information is always at your fingertips

Style	Material	Grip Design	Length	Thickness	Color

38-612	Viton-Butyl	Smooth Finish	12"	4/4 mil	Black

Brand: **Ansell**

ANSELL NEOPRENE

- Case hardened to increase chemical and abrasion resistance
- Excellent resistance to a wide range of chemicals, including oils, acids, caustics and solvents
- Cotton flock lined for comfort (29-865)
- Very good dexterity and sensitivity
- Treated with Sanitised®- Actifresh® to reduce bacterial buildup
- Complies with FDA food handling requirements (21 CFR 177.2600)

Style	Material	Liner Material	Cuff Style	Grip Design	Length	Thickness	Color

Rubberex Gloves

Rubberex Super Neoprene

- RUBBEREX NEO400**
- Heavy duty flock lined neoprene gloves
 - Chloroprene rubber compound
 - Excellent puncture and tear resistance
 - Good resistance to most solvents, mild acids, oil and fat
 - Premium grade soft cotton interior lining for wearers comfort
 - Food Safe - CE & FDA compliance

Article No.	Length / mm	Thickness / mm	Color
NEO400	330 +/- 10	0.68 +/- 0.03	Black
NEO400	330 +/- 10	0.68 +/- 0.03	Black

Brand: **Rubberex**

Rubberex Super Nitrile

- RNF18**
- Flocklined interior for comfort
 - Length : 330mm, Thickness : 0.45mm
 - Popular solvent resistance glove
 - Premium grade Acrylonitrile Butadiene rubber
 - Resistant to Solvents, Oils & Fats
 - Specially formulated for improved dexterity
 - Minimal finger fatigue
 - Food Safe - CE & FDA compliance

Brand: **Rubberex**

Rubberex Bk39-18

- Pure natural latex for better mechanical resistance
- Extended length - 450mm, heavy duty glove
- Thicker gauge
- Satin finish, unflocked interior
- Sanitised to inhibit bacterial growth

Brand: **Rubberex**

Rubberex Rnu 22-18

- Extended length - 450mm, unflocklined / nitrile
- Thicker gauge, 0.58mm for increased resistance
- Specially formulated for dexterity
- Food safe - CE Food Safe and FDA Compliance

Brand: **Rubberex**

Showa Gloves

771 Showa Nitrile Gloves

Cotton/polyester material/Nitrile coating

- Fully coated, extra coating over entire hand
- A flexible, robust glove offering great dexterity and with good resistance to tearing
- Rough finish over entire surface
- Impermeable for working in damp or greasy environments, enabling you to grip objects securely
- Protects the hand from oils, hydrocarbons, grease and abrasion, with effective long lasting grip
- Surface provides tactile feel and better grip

Brand: **SHOWA**

Showa# 772 Nitrile Long Sleeve Gloves

- Fully coated, extra coating over entire hand
- Extended sewn sleeve, elasticated border
- Rough finish over entire surface enabling you to grip objects securely
- Offers great dexterity and with good resistance to tearing
- Extended protection for the entire arm
- Eyelet for ventilation and hanging

Brand: **SHOWA**

HAND PROTECTION

KV660 Aramid Oil Resistant

Aramid knit PVC coating

- Fully coated, extra coating over entire hand
- Rough finish over entire surface
- Kevlar fibre
- A flexible easy-maintenance glove providing effective protection against cuts and with very good durability.
- Seals and protects the hand against chemicals while remaining flexible
- Impermeable for working in damp or greasy environments, enabling you to grip objects securely
- Surface provides tactile feel and better grip

Brand: **SHOWA**

B0700 Clean White

Unsupported PVC coating

- Fully coated
- A thin, light glove with a "second skin" feel
- Seals and protects the hand against chemicals while remaining flexible
- Impermeable for working in damp or greasy environments
- Surface enables a secure grip on slippery objects
- Non-powdered, "slip-on" treatment

Brand: **SHOWA**

130 PVC Thin Glove

Thin PVC unlined, slip-on treatment

- Anatomically formed
- Excellent dexterity and durability
- Adapts to fit hand
- Resistant to oils, acids and alkalis
- Non powdered
- Smooth interior treatment
- No latex allergy problems
- Unsupported 100% PVC unlined glove
- Thickness: 0.30 mm
- Length: 30 cm
- Color
- #130 : White(L), Pink(M), Green(M)

Brand: **SHOWA**

GP-KV2R Nitrile Aramid Grip

Aramid knit Nitrile coating

- Coated palm
- Elasticated cuff
- Rough finish over entire surface
- Kevlar fibre
- A flexible easy-maintenance glove providing effective protection against cuts and with very good durability.
- Protects the hand from oils, hydrocarbons, grease and abrasion, with effective long lasting grip
- Breathable back of hand to reduce perspiration
- Surface provides tactile feel and better grip

Brand: **SHOWA**

B0710 Clean White Long Sleeve

Unsupported PVC coating

- Fully coated
- A thin, light glove with a "second skin" feel
- Extended bonded sleeve, elasticated border
- Seals and protects the hand against chemicals while remaining flexible
- Non-powdered, "slip-on" treatment
- Eyelet for ventilation and hanging
- Impermeable for working in damp or greasy environments
- Surface enables a secure grip on slippery objects
- Extended protection for the entire arm

Brand: **SHOWA**

495 Cold & Oil Resistant

Cotton knit PVC coating

- Fully coated, extra coating over entire hand
- Topstitched edge
- Rough finish over entire surface
- Removable acrylic lining
- A flexible, soft glove that absorbs perspiration, for ultra comfortable extended wear and with good mechanical resistance.
- Seals and protects the hand against chemicals while remaining flexible, up to 20
- Impermeable for working in damp or greasy environments, enabling you to grip objects securely
- Surface provides tactile feel and better grip
- Effective cold protection, with easy clean lining

Brand: **SHOWA**

160 Oil Resistant Unlined

Unsupported PVC coating

- Fully coated
- A thin, light glove with a "second skin" feel
- Seals and protects the hand against chemicals while remaining flexible
- Special hydrocarbon treatment
- Non-powdered, "slip-on" treatment
- Impermeable for working in damp or greasy environments
- Surface enables a secure grip on slippery objects

Brand: **SHOWA**

GP-KV1 Aramid Grip

Aramid knit / Natural latex coating

- NR Coated palm for good grip, dexterity and durability
- Elasticated cuff
- Rough finish over entire surface
- Seamless knitted 100% liner made of Kevlar® for impressive cut resistance
- A flexible easy-maintenance glove providing excellent abrasion and tear resistance
- Protects the hand in damp environments or against aggressive detergents or alcohols
- Breathable back of hand to reduce perspiration
- Anatomically designed for comfort and fit

Brand: **SHOWA**

540D HPPE Palm Fit

- Polyethylene knit Polyurethane coating**
- High performance polyethylene (HPPE) & Coated palm
 - A flexible, light glove providing effective protection against cuts and very resistant to abrasion
 - Protects the hand from oils and abrasion while remaining elastic and breathable
 - Elasticated cuff
 - Breathable back of hand to reduce perspiration

Brand: **SHOWA** 

370 Black/ White Assembly Grip

- Nylon knit / Nitrile coated**
- Nitrile Coated palm
 - A light, elastic low-lint glove, resistant to deformation and which keeps its shape longer
 - Protects the hand from oils, hydrocarbons, grease and abrasion, with effective long lasting grip
 - Breathable back of hand to reduce perspiration
 - Minimal allergy risks
 - Designed for easy movement and continuous wear

Brand: **SHOWA** 

317 Hi-Viz

- Polyester knit / Natural latex coating**
- Coated palm
 - Elasticated cuff
 - Rough finish over entire surface
 - Phosphorescent marking after light-storage
 - A flexible, robust glove offering great dexterity and with good resistance to tearing
 - Protects the hand in damp environments or against aggressive detergents or alcohols
 - Breathable back of hand to reduce perspiration
 - Surface provides tactile feel and better grip
 - Increased safety in poor lighting conditions

Brand: **SHOWA** 

B0500 Black Palm Fit / B0500 White Palm Fit

- Nylon knit / Polyurethane coating**
- PU Coated palm
 - Elasticated cuff
 - A light, elastic low-lint glove, resistant to deformation and which keeps its shape longer
 - Protects the hand from oils and abrasion while remaining elastic and breathable
 - Breathable back of hand to reduce perspiration
 - Minimal allergy risks

Brand: **SHOWA** 

350R Nitrile Grip

- Polyester/cotton knit Nitrile coating**
- Coated palm
 - Elasticated cuff
 - Rough finish over entire surface
 - A flexible, robust glove offering great dexterity and with good resistance to tearing
 - Protects the hand from oils, hydrocarbons, grease and abrasion, with effective long lasting grip
 - Breathable back of hand to reduce perspiration
 - Surface provides tactile feel and better grip

Brand: **SHOWA** 

B0600 Top Fit

- Nylon knit / Polyurethane coating**
- Coated fingertips
 - Elasticated cuff
 - A light, elastic low-lint glove, resistant to deformation and which keeps its shape longer
 - Protects extremities from oils and micro-cuts while remaining flexible
 - No fingerprints left on handled objects, extremities protected
 - Minimal allergy risks
 - Great freedom of movement for the wrist

Brand: **SHOWA** 

330 Re-Grip

- Polyester/cotton knit Natural latex coating**
- Coated palm, reinforced coating at thumb crotch
 - Elasticated cuff
 - Rough finish over entire surface
 - A flexible, soft glove that absorbs perspiration, for ultra comfortable extended wear and with good mechanical resistance.
 - Protects the hand in damp environments or against aggressive detergents or alcohols
 - Increased resistance in areas subject to most stress
 - Surface provides tactile feel and better grip

Brand: **SHOWA** 

HAND PROTECTION

Heat Resistance Gloves

Ansell Themaprene Gloves

- Top quality neoprene coating protects against a wide range of chemicals
- The chemical resistance of neoprene with a soft thermal liner
- Protects hands against intermittent contact with hot surfaces up to 400°F and offers lightweight cut resistance

Style	Liner Material	Cuff Style	Grip Design	Length	Color
19-024	Fleece/Jersey	Gauntlet	Rough Finish	18"	Black
19-026	Fleece/Jersey	Gauntlet	Rough Finish	26"	Black

Brand: **Ansell**

Ansell Crusader® Flex 42-474

- Non-woven felt insulation and a full-length heat barrier designed for intermittent handling of objects up to 400°F
- 14" Gauntlet slip-on, Light gray nitrile
- Two-piece construction eliminates outseams for better finger comfort, dexterity and flexibility
- Bonded nitrile coating protects against snags, punctures, abrasions and cuts
- Provides excellent grip when handling dry or oily surfaces
- Contains no asbestos
- Back of hand heat insulation

Brand: **Ansell**

Hercules Zetex/Kevlar Palm Gloves

- With Kevlar palm and Nomex Aramid fibers liner.
- Provide excellent abrasion and cut resistance.
- High temperature from 600 °f to 800 °f
- Length : 14 inches

Hercules Flextra Kevlar Palm

- With leather and Kevlar reinforced palms
- Provide excellent abrasion and cut protection
- Heat protection range from 600 °f to 800 °f
- Length: 14 inches and 18 inches

Newtex Zetex Aluminized Gloves

- Made with metalized aluminium film bonded to durable Zetex fabric.
- Provide excellent insulation, flexibility and resistance to delaminating, cracking and peeling.
- Designed to reflect 90% of the radiant heat.
- Length : 14 inches.

Electrical Gloves

Regeltex Insulating Gloves For Electrical Works

Our full range of insulating gloves for live working complies with the specifications of the European standard EN 60903:2003 and the international standard IEC 60903:2002.

Likewise, our production is subjected to a system for ensuring EC quality of production by means of monitoring to implement article 11b of the 89/686/EEC directive relating to Personal Protective Equipment which classifies insulating gloves for live working in category III (mortal risks).

Electrical Requirements

Routine test and sampling test in alternating current

Class	Max Operating Voltage (volts)	Proof Test Voltage (volts)	Withstand Voltage (volts)
00	500	2500	5000
0	1 000	5000	10 000
1	7 500	10 000	20 000
2	17 000	20 000	30 000
3	26 500	30 000	40 000
4	36 000	40 000	50 000

1. In the choice of class, it is important to define the network nominal voltage which must not exceed the maximum operating voltage. For multiphase networks, the network nominal voltage is the voltage between phases.
2. The test voltage is the one applied to gloves during the individual routine tests.
3. The withstand voltage is the one applied during the validation tests after the gloves have been conditioned for 16 hours in water and after a 3-minutes test at the proof voltage.

Packaging

Each pair of gloves is packaged in a different coloured opaque sachet depending on its class of protection.

The following information is given on the packaging : class, size, categories, type of cuff, length, test date, manufacture batch number and validation batch number.

Regeltex Electrician Leather Over Glove

- Worn over the insulating gloves for electrical works
- Protect against mechanical hazards and against electrical arc if need be.
- These gloves in cowhide leather, palmate thumb, provided with a cuff in cow split (10cms) and a Velcro strap for tightening, are also silicone to increase their characteristics of waterproof

Brand: Regeltex

HAND PROTECTION

Specialty Gloves

Chainex 5 Finger Ambidex Stainless Steel Glv

- Lightweight, AISI 316L stainless steel rings
- Adjustable nylon straps with snap fasteners
- Five-finger glove is reversible/ambidextrous
- Instructions, maintenance, cleaning/storage information included
- Complies with USDA requirements

Brand: SPERIAN

Mapa Trionic®/E-194

- Pair packed TRlonic E-194 Tri-polymer blend
- 14" Length with 20mil thickness
- Gloves offer superior performance to natural rubber
- MAPA's unique blend of nitrile, neoprene and natural rubber provides extreme comfort and durability.
- Grip wet and dry objects safely with the raised "Z" pattern on the palm and fingers.

Brand: MAPA

North Natural Rubber Latex Gloves

- Orange natural rubber latex gloves
- Diamond Embossed palm for excellent grip
- Superior tensile strength with excellent tactility, sensitivity and comfort
- Individually packed (Per Pair)
- 15" Length with 18mil thickness

Brand: NORTH

Tempshield Cryo Glove

Hand and arm protection for ultra cold environments

- Superior thermal protection
- Water resistant
- Comfortable/Lightweight/Excellent dexterity
- Breathable/Stay-dry lining
- Protection from splashes of cryogenic liquids
- Available in 15" and 18"

Brand: Tempshield

Impact Extreme Gloves

Designed to protect hand from impact

- Impact protection at back in advanced *SupraBlockImpact* material
- Impact elements covered with *SupraBlockStop* protection material
- Japanese high quality microfibre
- Improved grip
- Long neoprene cuff
- *SupraCoatDry* oil & water repellency treated fabrics EN 388-3242 CE kat 2

Brand: EUREKA

Dry Box Gloves

L 32 "8" Port Neoprene Dry Box Glv

- The gauntlet is made of polychloroprene material.
- Provides safety against mechanical hazards of tear strength, perforation and breaking.
- The grade of polychloroprene has been chosen for its high mechanical properties and low modulus.

Brand: PIERCAN

AK-Premium Cleanroom Chemical Resistant Gloves

Part No	Description	Sizes	Grip/Cuff
AK1815/O	Orange, Powder Free	7, 8, 9, 10, 11	Diamond/ Beaded
Length/ Gauge	Inner Pack		Case Pack
15"/20 mil	1 pair per inner bag 10 pairs per outer bag		10 outer bag (100pairs)

Natural Rubber Late clean-room chemical resistant gloves.

- 100% natural rubber latex has excellent dexterity and elasticity
- Powder-free manufacturing process reduces particulate and extractable contamination.
- Diamond embossed palm has excellent dry and wet grip.
- Cleanroom packaged to protect gloves from airborne contamination. Double bagged with cleanroom compatible packaging and labeling materials.
- Size embossed on gloves so there is no ink to contaminated process.
- Testing: IEST-RP-CC005.3 (modified) particulate and extractables; ASTM 739 permeation.
- Applications : Cleanroom operations such as acid etching, handling etching and cleaning acids and caustics. lab room maintenance

Cautions: This product contain natural rubber latex proteins which may cause allergic reactions in some individuals.

Work Gloves

Coloured Leather Denim Cuff Working Glove

- Coloured Cowhide split leather working glove
- Cotton canvas back and denim cuff

Cowhide Argon Leather Glove

- Soft cowhide full grain leather argon glove
- Colour : Gray

Goatskin Leather Argon Glove

- Soft goatskin full grain leather argon glove
- Length: 14"
- Colour : Grey

Leather Palm Fabric Back Mechanic Gloves

- Leather palm
- Stretch Fabric Back
- Elastic Cuff With Velcro

Polka Dot Cotton Gloves

- Cotton knitted glove with PVC dots on both side
- Reversible and washable for added saving
- Provides excellent grip

Red Rubber Coated Gloves

- Rubber coated gloves
- Diamond palm for better grip
- Economical

Yellow Working Gloves

- Cowhide grain leather working glove.
- Yellow Cotton canvas back and cuff.

Cotton Knitted Gloves

- Available in 500gsm, 650gsm, 750gsm & 900gsm

Semi Leather Denim Cuff Working Glove

- Cowhide split leather working glove
- Cotton canvas back and denim cuff

Green / Grey Welding Leather Gloves

- Heat-resistant cowhide split leather welder's glove with lining.
- Length: 14"
- Color Available: Green, Grey

Orange Rubber Coated Gloves

- Rubber coated gloves
- Provides grip and abrasion resistance
- Economical

Red Pvc Dipped Gloves

- General purpose chemical resistant gloves, with good resistance to routine hazards.
- Economical
- Available in 27cm & 35cm

White Cotton Gloves

- 100% Cotton work glove.
- With easy to stretch knitted fabric
- Offer superior flexibility and excellent dexterity, very light and easy to wear.

HAND PROTECTION

Disposable Gloves

ANSELL Touch N Tuff® 92-600

- Made of 100% nitrile
- Smooth Finish Powder Free
- Length : 9.5", Thickness : 5mil
- Offers three times the puncture resistance of standard latex or vinyl gloves
- Combines excellent fingertip sensitivity with exceptional durability
- Gives a high level of protection against grease and oil
- Lightweight and comfortable to wear
- Silicone-free
- Touch N Tuff® gloves comply with FDA food handling requirements (21 CFR 177.2600)
- Packing 100pcs/box, 10boxes/ctn

Brand: **Ansell**

Code: 92-600

G20 Atlantic Green Nitrile Gloves

- Food contact certified
- Powder Free
- Latex Free
- Ambidextrous
- Compliant with AQL 1.5 for pinholes
- Textured finger tips providing excellent grip
- Excellent tactile sensitivity
- Beaded Cuff
- 0.06mm thickness (minimum)
- PPE Category III (CE Complex) product classified by EC Council Directive 89/686/EEC
- Maximum touch sensitivity
- Comfort and flexibility

Dale Fire Retardant Coverall

Model : daletec-coverall-red

Model : 61130-daletec-coverall-blue

Daletec

Daletec is a Norwegian based producer of flame retardant fabrics, with customers in all continents. Because of several decades of product development and improvements Daletec fabrics are known in the market for its high quality, durability and environmental focus.

Daletec fabrics are certified according to the most relevant international standards for flame spread, welding, electric arc and antistatic properties, and a range of fabrics are available as multiproperty with High Visibility certificates and water penetration.

Safety:

We guarantee durable flame resistance in all our products.

Innovation:

We have a vision not only to offer the best protected fabric in the world, but to develop new and useful protective and comfortable features in all possible combinations.

Quality:

We are using the best in raw material, chemicals, and textile dyes in our unique production process

Environment

DALETEC Flame retardant fabrics do not contain any environmentally damaging or toxic substances such as bromine or halogens. Waste gas emission during combustion of Daletec products is actually less environmentally damaging than for untreated cotton textiles! In addition, Daletec is certified to the ISO 9001 Quality Assurance and ISO 14001 Environmental Management Standard, and is EMAS approved. The company continuously seeks to reduce emissions to air and water. Another aspiration is to achieve the lowest level of chemical use possible, which benefits end-users and environment alike.

A40 Liquid and Particle Protection Apparel

- Suitable for critical production environments such as pharmaceutical industries, manufacturing, utilities, electronics, agriculture and paint spraying.
- Protection against chemical splash and particles**
- Film laminate technology provides an outstanding barrier against a wide range of chemicals
 - Particle protection, holds out >99% of fibres greater than 1 micron
 - Strong triple stitched seams help protect against tearing
 - Hood designed for respirator use and freedom of movement
 - Full length zip, eases ability to get in/ out of garment
 - Ultra low-lint performance, film laminate and internal seams significantly reduce levels of lint
 - Anti-static fabric EN 1149-1 for critical areas
 - Silicone free, ideal for paint-spraying
 - EN 1073-2 approved for radioactive dust protection⁽¹⁾
 - Compressed packaging provides auto-dispensing system and reduces storage space
 - Sealed polybags for low contamination risk

Products Performance Data

Fabric Tests	Test Method	Class ⁽²⁾ or Result

King's Comfort Series

A NEW RANGE OF SAFETY FOOTWEAR BY KING'S

For the first time, King's new range incorporates a new European look to its 800 series lead product. Under the handsome shoe upper is a brand new toecap design which accommodates all 5 toes of the wearer - without squashing them! KING'S molded contoured PU full foam insoles come standard with the new range. These features together with a brand new sporty sole design combine to provide unrivalled good looks, safety and COMFORT.

Retractor Fall Arrester Block

- Casing made up of high impact strength polymer, to prevent breakage and is nearly undestructible
- Comes with galvanized steel wire rope of dia 4.5mm anchorage eye with swivel action
- Prevents undue twist of rope while working or in the event of a fall
- Available from 5 meter, 6 meter, 7.5 meter, 10 meter, 12 meter, 18 meter, 20 meter, 25 meter and 30 meter
- Conforms to EN360:2002

Rope Grab Fall Arrester

- Works on 14mm dia. anchorage line
- Arrests fall with very short fall distance
- Conforms to EN353-2:2002

Retractable Mini Fall Arrester Block

- Having a retractable webbing of width 47mm
- Length 2.5m
- Conforms to EN360:2002

Rope

- 14mm dia polyamide rope
- One side loop
- Other side end stop knot
- Length : 10m - PN-310
20m - PN-920
30m - PN-930

Quad Pod

- Lightweight 4 Legged Quadpod Ideal for Confined Space Rescue.
- Multi - positioning: Adjustable and removal legs extending from 1.35 mtrs to 2.3 mtrs.
 - Pivoting rubber studded feet for greater stability even on rough terrain.
 - High grade corrosion resistant aluminium for greater durability even in harsh environments.
 - Safe working load - 500kg or 3 men.
 - Weight 12.5kg.
 - Complying with EN-795 Class B.
 - It may be used for confined space applications, as well as for rescue. It is recommended to use it in conjunction with the self tailing winch.

SPILL CONTROL AND MANAGEMENT

SPILL CONTROL AND MANAGEMENT

3M Chemical Sorbent Pad C-PD914DD

- Ideal for cleaning up small spills and wiping down contaminated areas
- Size 9.25" X 14.5"
- 25 pieces/box
- Absorbs approximately 4 gallons of spill

Brand : **3M**

3M Chemical Sorbent Pad P-110

- Designed with quick and easy response in mind
- Convenient dispenser boxes, for storage in confined spaces
- Size 11" X 13"
- 50 pieces/box
- Absorbs approximately 4 gallons of spill

Brand : **3M**

3M Chemical Sorbent Pillows P-300

- Used in areas where more capacity is desired
- Encases particulate sorbent material
- Size 7" X 15"
- 16 pieces/case
- Absorbs approximately 8 gallons of spill

Brand : **3M**

3M Chemical Sorbent Mini-Boom P-200 / P-212

- Designed to effectively encircle spills and contain leaks
- 3 inches in diameter
- P200
 - 4 ft in length
 - 12 booms/case
- P212
 - 12 ft in length
 - 4 booms/case

Brand : **3M**

3M Chemical Sorbent Folded, High capacity C-FL550DD

- Dispensed in the form of a 5 inch wide continuous roll
- Perforated every 16 inches
- Can be unfolded into pads or pillows
- Size 5" X 50 ft
- Absorbs up to 10 gallons of spill

Brand : **3M**

3M Chemical Sorbent Roll, High capacity C-RL15150DD

- Can be easily cut to cover small areas or fit tight corners
- Used to cover bench tops in anticipation of a spill while also acting as a work surface
- Size 15.25" X 150 ft
- Absorbs up to 31 gallons of spill

Brand : **3M**

3M Chemical Sorbent Folded Spill Kit C-SKFL31

- Packaged in a 20 gallon drum
- Easily identified by the bright yellow colour
- Fast transport to a spill site
- Absorbs up to 31 gallons of spill

Contains:

- 2 rolls of folded sorbent (each 5" X 50 ft)
- 30 Pads (each 17" X 19")
- 3 Temporary disposal bags and ties

Brand : **3M**

3M Petroleum Sorbent Folded Spill Kit P-SKFL31

- Packaged in a 20 gallon drum
- Easily identified by the bright white colour
- Fast transport to a spill site
- Absorbs up to 31 gallons of spill

Contains:

- 2 rolls of folded sorbent (each 5" X 50 ft)
- 30 Pads (each 17" X 19")
- 3 Temporary disposal bags and ties

Brand : **3M**

3M Chemical Sorbent Spill Kit C-SKFL5

- Excellent solution for storage where space is limited
- Ideal for use in laboratory spills
- Allows the material to be used as a pillow, pad, roll or boom
- Included containment bag and tie
- Absorbs up to 5 gallons of spill

Brand : **3M**

3M Chemical Sorbent Spill Response Pack SRP-CHEM 3

- SR-CHEM will sorb most aggressive chemicals
- Encased in a box which can be used as a warning sign
- Ideal for spills up to 3.5 gallons

Contains:

- 3 chemical sorbent mini-booms
- 10 chemical pads
- 1 Poly bag for temporary disposal

Brand : **3M**

Petroleum Sorbent Spill Response Pack SRP-PETRO

- Designed to sorb and contain small petroleum spills and leaks fast
- SRP-PETRO will sorb hydrocarbons based liquids and repel aqueous based liquids
- Encased in a box which can be used as a warning sign
- Ideal for spills up to 4 gallons

Contains:

- 3 chemical sorbent mini-booms
- 10 chemical pads
- 1 Poly bag for temporary disposal

Brand : **3M**

Oil Pad

- Almost all workplace have operations that can result in drips, leaks, splashes and spills and this can cause problems, from minor annoyances to major safety hazards.
- Our Oil-Sorb Pad and Pillow consist of absorbents that are designed for the single purpose of containing, picking up and assisting in the safe disposal of loose liquids.
- They are lighter, cleaner and easier to work with and are much more efficient compared to rags, sawdust, newspaper and even clay.
- Our system's efficiency makes clean-up and disposal significantly faster, easier and less costly.

- Code : 42880
OIL-SORB Pad Medium
Size : 40cm x 50cm
Packing : 100pcs/case

- Code : 42881
OIL-SORB Pillow Blue
Size : 25cm x 40cm
Packing : 20pcs/case

PROFESSIONAL**

INDUSTRIAL PRODUCTS

Emergency Equipment

HAWS 8300 Eyewash & Shower Combination Unit

The Haws 8300 combines the use of an ABS showerhead and anti-surge Soft-Flo eyewash heads for the irrigation process. Emergency combination unit is equipped with an in-line 50 x 50 mesh water strainer and pop-off dust covers, so when debris is present, the irrigation process protected. Virtually eliminating mishaps, the unit's safety feature include: universal emergency sign, high visibility stripe, and a foot treadle so the eyewash can be activated without the use of the operators hands.

- A great addition to unsafe environments where the eyes and body may be exposed to corrosive materials.
- Required minimal maintenance and is equipped with test card to record weekly testing
- Reduces installation time because eyewash and valve assembly is pre-built and fully water/pressure tested.
- Solid galvanized steel construction make for one sturdy piece of emergency equipment.
- Certified by CSA to meet the ANSI Z358.1 Standard for Emergency Eyewash and Shower Equipment

HAWS 8330 Eyewash and Shower Combination Unit - Stainless Steel

Model 8330 all stainless steel combination shower and eye/fash wash features a 10 1/2" stainless steel showerhead and a stainless steel receptor with twin stainless steel Soft-Flo eyewash and face spray ring. Model is equipped with the 9012 stainless steel dust cover assembly that protects the receptor, eyewash assembly and face spray ring from airborne contaminants. A pull rod activates shower. Push flag or foot treadle activates eyewash. Pipe and fitting: 1 1/4" Type 403 stainless steel. Supply and Waste: 1 1/4" IPS

Model 8330 is certified by CSA to meet the ANSI Z358.1 Standard for Emergency Eyewash and Shower Equipment

HAWS 7260BT Eyewash Station

- Wall Mounted Eyewash
- Round 11" green ABS bowl.
- Aluminum wall bracket.

HAWS 7461 Eyewash Station

HAWS 7461 pedestal mounted eye and face wash features the medically acclaimed AXION MSR™ eye/face wash head assembly. This revolutionary inverted flow design is the only product on the market that provides a Medically Superior Response consistent with all EMT, emergency room and doctors' office protocols by sweeping contaminants away from the vulnerable nasal cavity. Traditional eyewashes irrigate from the outside edge of the eye back toward the nose, where contaminants can then be flushed into the nasal cavity through the lacrimal punctum, nature's ocular cavity drain.

HAWS 7777-7778 Eyewash Station

Stainless Steel Pedestal Eyewash
11' Diameter Stainless steel bowl
Twin soft-flo stainless steel anti-surge eyewash heads
Circular stainless steel spray head
Stainless Steel dust cover
Stainless Steel push flag & foot treadle

Model 7778B, wall-mounted eye/face wash and all stainless steel components.

HAWS 7501 Portable Eyewash Station

- Tank : 9 gallon capacity. FDA high-density polyethylene material.
- Portability : has single top handle for easy carrying when empty and can be handled easily by one person.

INDUSTRIAL PRODUCT

HAWS 7500 Portable Eyewash Station

- Using gravity to supply a continuous flow of clean water to injured personnel for a full 15 minutes at .4 gpm (1.5 L).
- Featuring a FDA approved high-density green polyethylene tank easily activated by pulling the yellow activation arm down to the open position
- Supplied with one bottle of water preservative additive
- A wide-fill opening with threaded cap permits easy inspection, cleaning and filling
- Relocation is simple due to the easily mounted (bracket included) and light design of this 16 gallon (60.6 L) portable
- Measurements: 22-1/2" high, 21-1/2" wide, 19-1/2" deep (57.2 x 54.6 x 49.5 cm)
- Meets ANSI Z358.1 Standard for Emergency Eyewash and Shower Equipment.

Fire Fighting Equipment

Fire Blanket

- Fire Blankets are used extensively on board ships, in factories, and in commercial buildings. It is an ideal fire suppression tool in the household, especially for kitchen, dustbin, and other small fires. The blanket is a woven fiberglass fabric and comes in a satin weave (i.e. smooth, soft, and tightly weaved) which protects against skin irritation. The fabric can be easily wrapped around uneven surfaces. It provides an effective outer layer protection against unwanted contact with heat.
- The blanket comes in sewn standard sizes of 4' x 4', 4' x 6', 6' x 6'.
 - Fire Blankets come in compact PVC bags or Rectangular containers.
 - Simply cover the flame with the blanket to extinguish the fire.

Gas Monitoring

BW GasAlertMicroClip XT

Multi-gas made simple
The slim and compact GasAlertMicroClip XT provides affordable protection from atmospheric hazards. With continuous visual confirmation of detector operation and compliance provided by the IntelliFlash™ feature. Simple one-button operation for the ultimate ease of use significantly reduces training times. The GasAlertMicroClip XT is fully compatible with BW's MicroDock II automatic test and calibration system.

BW GasAlertMax XT II

Go the distance, and save
GasAlertMax XT II is the smart, simple, economical way to compliance. Workers feel safe and incidents are minimized so everyone will be able to do more. That means savings realized from business continuity and productivity.

Simple operation, with SmartSample pump. GasAlertMax XT II reliably monitors up to four hazards and combines straightforward one-button operation with our robust, motorized pump for intelligent, remote sampling, ideal for confined spaces. The GasAlertMax XT II is fully compatible with MicroDock II automated test and calibration system.

Dräger Tubes

The Dräger-Tubes are an extremely cost effective and, above all, precise method of short term gas measurement. The Dräger Tube, a sealed glass vial, contains on a solid carrier material a chemical reagent which reacts to a particular gas or vapor with a characteristic colour change. To cause this reaction, a defined volume of ambient air is drawn through the tube using a gas detector pump. Even small quantities of gas are sufficient, and the user can easily read and analyse the result because of the scale marks printed on the tube.

Dräger Accuro

Dräger-Tubes and Dräger accuro Gas Detection Pump - Tried and tested:
The Dräger's tube method has been an indispensable measurement method for applications such as workplace air investigation, health hazard measurements, emission control and technical gas analysis. In addition, with the Aerotest kit, the air quality from compressed air cylinders or airline system can be checked to ensure that the air is breathable.

Dräger Accuro 2000

Fully automatic measurement: The accuro 2000 pump system is suitable for spot measurements when using Dräger tubes that have a higher number of strokes, or for continuous operation. It is used in combination with the Dräger accuro gas detector hand pump.

Dräger Pac® 3500

Accurate and easy to use, the Dräger Pac® 3500 is ideal for industrial personal monitoring applications. Providing quick detection of carbon monoxide, hydrogen sulphide or oxygen, this robust single gas detector has a lifetime of 2 years and is made specifically to fit industrial safety requirements.

Dräger X-am® 2500 Multi-Gas Monitor

The Dräger X-am® 2500 was especially developed for use as personal protection. The 1 to 4 gas detector reliably detects combustible gases and vapours, as well as O₂, CO, NO₂, SO₂, and H₂S. Reliable and fully mature measuring technology, durable sensors and easy handling guarantee a high degree of safety with extremely low operating costs.

DURABLE ELECTROCHEMICAL SENSORS

Fully developed, high performance Dräger sensors in an extra small format for CO, H₂S, O₂, SO₂, and NO₂ gases enable safe use in industry, mining, and in refineries. The impressive hydrogen sulphide sensor has a high resolution, so it can reliably measure even very low workplace limits. The non-consumptive and lead-free sensor for oxygen is characterised by an especially long service life of more than 5 years. Our CO and H₂S sensors also have this long service life expectation, so they contribute to especially low operating costs.

INDUSTRIAL PRODUCT

POISON RESISTANT EX SENSOR

The innovative, catalytic Ex sensor is impressive due to its high resistance to silicone and hydrogen sulphide. Together with the high degree of drift stability, this resistance enables an extraordinarily long service life of more than 4 years. Its high sensitivity with regard to flammable gases and vapours is confirmed by technical approval for measuring according to IEC/EN 60079-29-1 from methane to nonane. This approval also demonstrates the suitability of this instrument for use in refineries and in the chemical industry as well.

MAXIMUM SAFETY

The Dräger X-am® 2500 has ES approval for zone 0, so it is clearly designed for very high user safety in areas subject to explosion hazard. The functional design ensures that gas can enter from above and from the side – even if the instrument is inside a pocket or if the front gas entry is accidentally covered.

MAINTENANCE : FAST, EASY, INEXPENSIVE

From functional test to complete documentation, users have access to practical solutions that provide safety for implementation at any time. The Dräger Bump Test Station, which does not require a local power source, and the automatic Dräger X-dock testing and calibration station for comprehensive equipment management are ideal system additions that save time and effort. Together with the Dräger X-dock, the high quality Dräger sensors enable quick bump tests of 8 to 15 seconds with very low gas consumption. This significantly reduces your equipment operating costs.

*with standard sensors : CO, H₂S, O₂, SO₂, and NO₂

DIFFUSION OR PUMP

For clearance measurements for tanks and shafts or when searching for leaks, an optional external pump with a hose up to 30 m long is the optimum solution. When the measuring instrument is inserted, the pump function starts automatically. The switch from diffusion to pump operation can be handled quickly and easily without tools or screws.

ERGONOMIC AND ROBUST

Thanks to its low weight and ergonomic design, the Dräger X-am® 2500 offers a high degree of wearing comfort. The practical two button control panel and easy menu navigation allow the instrument to be used intuitively, despite its comprehensive functionality. The integrated protective rubber coating and sensors that are not sensitive to shock provide additional safety in case of impacts or vibrations. Moreover, the Dräger X-am 2500 is not sensitive to electromagnetic radiation, e.g. from wireless devices. The Dräger

X-am 2500 is water and dust resistant in accordance with protection class IP 67, so full functionality is guaranteed even if it falls into the water.

RELIABLE POWER SUPPLY

The Dräger X-am 2500 can operate with either alkaline batteries or with rechargeable NiMH batteries. This enables a reliable power supply for more than 12 hours, and with the high capacity battery pack more than 13 hours. Depending on the requirements, the batteries can be charged either in the workshop or in a vehicle. Operating time without Ex sensor is typically more than 250 hours.

Safety Cutter

Minimise the risks of employee injuries and product damage through to use of safety cutters. Besides cuts and scrapes, use of unsuitable cutters can force employees into strained or unnatural postures and have blades that may break off violently. Our ambidextrous safety cutters are specially designed for easy and safe usage by any employee. Protect your workforce today.

EASycut™ Disposable Pocket Cutter

- Retractable blade prevents accidental cuts
- Ergonomic, Ambidextrous Design
- Dual safety design with a secondary safety action trigger that keeps the blade retracted when in pocket
- Cuts over 5000ft, dispose when blade is exhausted

EASycut™ 2000 Safety Cutter with Holster

- With extra functions for automatic activation of edge guide on holster
- Locks edge guide in "On"-Position when pulling out the safety cutter from the holster
- Efficient working and safe cutting without damaging the good
- Tape cutter at handle end
- Labeling field for personalization
- Safety grip for blade involvement
- Automatic pull out of edge guide on both sides from holster which is switched on/off by tilting lever
- Replacement blades in reserve compartment
- Metal Pin - on the handle end for opening tapes
- Adjustment of Cutting Depth - 3-Stage

EASycut™ 2000 Safety Cutter with Holster

- Safe and reliable cutting
- The blade automatically pulls back after conclusion of the cutting process even with activated cut function that excludes injuries nearly completely
- Protects against injuries and product damage
- Lockable cutting guide provides for a perfect cut directly below the packing edges Manual cutting guide in front at both sides (on the left and on the right)
- Top sided flap for replacing the blade or keeping replacement blades
- Metal Pin - On the handle end for opening tape
- Setting Screw - for 1-3 wavy cutting depth

PRO-JECT 2000 Safety Knife

- Unique blade design cuts the box/case without damaging the product

Lockout / Tagout System

Lockout Hasps

- Energy sources can be locked out quickly and easily by more than one worker for group lockout applications
- Heavy duty hasps with tamper-resistant designs to deter vandalism
- Non-Conductive lockout hasp provides protection against electrical hazards
- Variety of lockout hasp styles and sizes to accommodate a wide range of lockout applications

PSL-1
Hasp with 1.00" diameter jaw and overlapping tabs.

PSL-1.5
Hasp with 1.50" diameter jaw and overlapping tabs.

PSL-MLD
Multiple Lockout Hasp w/6' Vinyl Coated Galvanized Steel Cable w/Loop

INDUSTRIAL PRODUCT

Ball/Butterfly Valve Lockout Devices

- PSL-BV1 for Valve Diameter 0.25" to 1.00"
- PSL-BV2 for Valve Diameter 1.25" to 3.00"
- PSL-BV3 for Valve Diameter 2.0" to 8.0"

Cord Lockout Devices

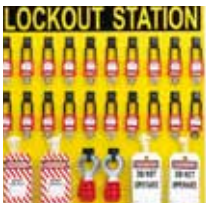

- PSL-CL110 For 120 Volt AC Cord Lockout Device
- PSL-CL480 For 240-480 Volt AC Cord Lockout Device

Large Handle Circuit Breaker Lockout Device

- Individual circuit breaker can be locked in the off position quickly and easily without any tools
- Compact, universal design fits a wide range of large handle circuit breakers

Lockout Stations

- PSL-4SWCA : Lockout station with components, 4 person
- PSL-10SWCA : Lockout station with components, 10 person
- PSL-20SWCA : Lockout station with components, 20 person

Electrician Lockout Kit

- PSL-PK-EA
- Kit contains a variety of lockout/tagout devices commonly used by an individual electrician

Power And Panel Distribution Lockout Kit

- PSL-KT-PWR
- Kit contains a variety of lockout/tagout devices commonly used by maintenance and repair personnel to isolate electrical distribution panels
- Durable steel case can be wall mounted or used as a portable case

Universal Circuit Breaker Lockout Device

- PSL-CB
- For breaker handles .30" – .60" tall and .25" – .44" thick

Global Plug Lockout

- PSL-P1
- Global plug lockout for 220 - 240 Volt AC/Industrial Plugs

Square D I-Line Circuit Breaker Lockout Device

- PSL-CBIL
- For breaker handles .30" – .60" tall and .25" – .44" thick

Contractor Lockout Kit

- PSL-KT-CONA
- Kit contains a variety of lockout/tagout devices commonly used by electrical contractors and multiple electricians

Mro Lockout Kit

- PSL-KT-MROA
- Kit contains a variety of lockout/tagout devices commonly used by maintenance and repair personnel in a facility

Gate Valve Lockout Devices

- PSL-V2 for Valve Handle Diameter 1.00" to 2.50"
- PSL-V4 for Valve Handle Diameter 2.5" to 5.0"
- PSL-V6 for Valve Handle Diameter 2.5" to 6.5"
- PSL-V9 for Valve Handle Diameter 6.5" to 10"
- PSL-V13 for Valve Handle Diameter 10" to 13.0"
- PSL-V2/V4/V6 Available in Red, Blue, Green & Yellow
- PSL-V9/V13 Available in Red & Yellow

High Security Padlock

- PSL-7**
- Aluminum body padlock, 1.06" shackle
 - Available In Red, Black, Blue, Green, Orange, Yellow

- PSL-7-LS**
- Aluminum body padlock, 3.0" long shackle
 - Available In Red, Black, Blue, Green, Orange, Yellow

Laminated Steel Padlock

- PSL-6**
- Laminated steel body padlock, 0.75" shackle
 - Available In Red, Black, Blue, Green, White, Yellow Bumper

- PSL-6-LS**
- Laminated steel body padlock, 2.00" long shackle
 - Available In Red, Black, Blue, Green, White, Yellow Bumper

Non Conductive Padlock

- PSL-8**
- 1.50" X 1.75" body
 - Available In Red, Black, Blue, Green, Orange, Yellow, Brown, Purple

Value Line Padlocks

- PSL-5**
- Laminated steel body padlock, 0.75" Shackle
 - All locks have black bumpers
 - Color-coded self-laminating padlock labels
 - Available in Black, blue, green, red, white & yellow labels

- PSL-5-LS**
- Laminated steel body padlock, 2.25" Shackle
 - All locks have black bumpers
 - Color-coded self-laminating padlock labels
 - Available in Black, blue, green, red, white & yellow labels

Pocket Sabre™ 1820 Flashlight

Built to last, the unbreakable ABS body resists chemicals, water and corrosion. The polycarbonate lens and focused Xenon lamp module produce a tight white beam that penetrates any hazardous condition.

Brand :

Model : 1820

StealthLite™ 2400 Flashlight

Popular with firefighters and adventure seekers. The unique easy slide thumb switch on the StealthLite 2400 Flashlight is easy to operate, even with gloves. The tough resin body is corrosion proof and resistant to extreme temperatures.

Brand :

Model : 2400

HeadsUp Lite™ 2600 Flashlight

The 2600 is a premier hands-free light. It comes with a hi-intensity Krypton lamp for intense brightness, as well as an emergency back-up lamp stored inside the body. The light weight ABS resin body is corrosion proof, submersible, and virtually indestructible. A rubber strap for a hard hat and a comfortable adjustable cloth strap for bare head are both included. Also, for extra comfort a forehead foam pad is attached behind the body. The 90° pivoting head allows you to aim light right where you need it. The HeadsUp Lite 2600 is powered by 4 AA alkaline cells (included).

- Light output / bulb life: 4,500 candlepower / 30 hours

Brand :

Model : 2317C

SabreLite™ 2000 Flashlight

This powerful flashlight was designed with one thing in mind: SAFETY. It carries more approvals than any other flashlight on the market today, making it safe for any hazardous environment or condition.

Brand :

Model : 2000

M11 Rechargeable 8050 Flashlight

The M11 Flashlight uses a rechargeable 4 C Nicad battery stick and a hi-pressure Xenon lamp to generate powerful, bright pre-focused beam. The body is molded with an all weather no-slip grip pattern.

Model : 8050

Pelican 4000 KingLite Flashlight

The Pelican 4000 KingLite Flashlight is a heavy duty, high powered spotlight packed with features. It uses a unique dual filament Xenon lamp that produces a bright beam that cuts through thick smoke, fog, and dust. The body of the Pelican 4000 Flashlight is made of unbreakable ABS resin with a

polycarbonate lens and thermoplastic rubber shroud that resists chemicals and corrosion. Two reflectors are included: a modified spot (stippled for a wide beam) and a laser spot (smooth for a tight collimated beam). Also, a back-up lamp is stored behind the reflector for emergencies.

The dual direction switch is easy to operate, even with thick gloves. And there's a locking slide feature to prevent accidental activation. The pistol grip/lantern handle quickly converts to multiple positions for flexibility. The 4000 also comes with a shock absorbing internal battery module that protects both the cells and the lamp from hard knocks. Powered by 8 D alkaline cells. The Pelican 4000 Flashlight also comes in a submersible version that is waterproof to a depth of 500 ft.

INDUSTRIAL PRODUCT

Skincare Products

STOKO® Skin Care can help solve your toughest hand cleaning problems and can show you how to promote wellness through proper hand hygiene. No matter your industry, occupation or away from home destination, we have the answers for healthy skin and well being.

Arretil®

- Ideal when working with grease, oil, cutting oils, and organic solvents
- Also simplifies the removal of epoxy and resins from the skin
- Silicone-free
- Available in 100ml tube

Brand : **STOKO**
FABRICATION

Kresto®

- Kresto®
- Extra heavy-duty cleanser for tough soils such as grease, oil, ink and carbon black
 - Contains all-natural, biodegradable walnut shell scrubbers to remove even ground-in dirt
 - Low solvent content, good skin compatibility

Available in :-
Kresto® 1/2 gallon pump-top bottle
Kresto® 2000ml One-Pump bottle
Kresto® 2000ml softbottle
Kresto® 250ml tube
Kresto® 4.0 Liter bottle
Kresto® Heavy Duty Hand Cleaner

Reduran® Special

- Specialty cleaner for the removal of dyestuffs
- Contains a reducing agent and synthetic detergents that emulsify the dye in water
- Contains all-natural, biodegradable walnut shell scrubbers
- Available in 1000ml soft bottle and 100ml tube

Brand : **STOKO**
FABRICATION

Stoko® Gel

- Alcohol-based gel that sanitizes without water
- Kills 99.99% of common germs that can cause disease
- Contains a conditioner to help prevent skin from drying out
- Available in :- 2000ml soft bottle, 4oz flop-top bottle & 8oz pump-top bottle

Brand : **STOKO**
FABRICATION

StokoDerm®

- Cream for use when skin is exposed to both water and oil-based substances during work
- Ideal for machine shops
- For use when working with water-insoluble substances such as carbon black, casting dust, waste oil and UV laquers
- Silicone-free
- Available in 100ml tube and 1000ml soft bottle

Brand : **STOKO**
FABRICATION

Travabon®

- Ideal for use when exposed to dirt, grease and oil
- Specially formulated to suspend dirt and oil for easy clean-up, when applied before work
- Silicone and oil-free
- Available in 100ml tube and 1000ml soft bottle
